VEHICLE IDENTIFICATION NUMBER (VIN) DECODING

Originally, Vehicle Identification Numbers (VIN) were designated to identify a vehicle, but there was no standardization. Beginning in 1981, vehicles were assigned an international VIN code consisting of 17 characters (which cannot include the letter I, O or Q) unique to each vehicle.

The VIN serves a variety of purposes. As well as providing identification in licensing and insuring the vehicle, the history of the vehicle can be tracked. VIN codes provide complete vehicle information including:

- is the vehicle defective (lemon car)
- has the vehicle been totaled or had major accident damage
- has the vehicle had flood damage
- has the vehicle had odometer fraud
- has the vehicle been stolen

To help decode the VIN, the following information has been provided:

- **1st - 3rd Characters**
  Identify the manufacturer (country), make and type of vehicle.
- **4th - 8th Characters**
  Identify the different aspects of the vehicle.

  For each type of vehicle (passenger cars, multi-passenger vehicles (MPVs), trucks, buses, trailers, motorcycles, incomplete vehicles other than trailers) different information is required.

  For cars, MPVs and light-duty trucks:

  4th - 5th positions are alphabetic

  6th - 7th positions are numeric

  8th position can be either alphabetic or numeric
- **9th Character (or Check Digit)**
  Is determined by a complicated formula.

  Each character is assigned a numerical value and then multiplied by the value assigned to its position. These values are added and then divided by 11. The remainder is the Check Digit. This character can be numeric or the letter X.
- **10th Character**
  Identifies the vehicle model year.
- **11th Character**
  Identifies the plant of manufacture.
- **12th - 17th Characters**
  Consists of a sequential production number for manufacturers producing more than 500 vehicles per year.

VIN plates are read through the windshield on the driver's side of most vehicles. A manufacturer may use a variation of the same size engine in one model. To insure that you are using the correct filters for the application, it is necessary to identify the proper engine code. The following examples illustrate the location of the engine code in most manufacturer's VIN codes.

Transmissions are arranged alphabetically by manufacturer, then numerically by model number.

IMPORTANT NOTICE

All product applications and specifications in Baldwin catalogs are based upon the most authoritative information available at the time of publication. However, there are many filter options offered by equipment manufacturers during a given model year making it impossible to be absolutely certain that all equipment of the same make, model and year will use the same filter. For this reason, we cannot be responsible for misapplications.

Original equipment manufacturer's tradenames or trademarks are for identification purposes only. There is no affiliation, sponsorship or connection with the original equipment parts or manufacturer.

Les boîtes de vitesses sont classées par ordre alphabétique et par fabricant, puis numériquement par numéro de modèle.

AVIS IMPORTANT

Toutes les données techniques et les applications de produits des catalogues Baldwin sont basées sur les meilleurs renseignements disponibles au moment de la mise sous presse. Toutefois, pendant une année donnée, un fabricant d'équipement d'origine peut offrir de nombreuses options de filtres qui font qu'il est impossible d'être absolument certain que tous les équipements de la même marque, du même modèle et de la même année utilisent le même filtre. Pour cette raison, nous ne pouvons pas être tenus responsables des mauvaises applications.

Les marques et noms de fabricant d'équipement d'origine ne sont utilisés que pour des raisons d'identification. Il n'existe aucune affiliation, parrainage ou connexion avec le fabricant d'équipement d'origine ou ses pièces.

NOTA IMPORTANTE

Todas las aplicaciones y especificaciones en los catálogos Baldwin están basadas en los informes más fidedignos obtenibles a la fecha de la publicación. Sin embargo, existen muchas opciones para seleccionar diferentes filtros para cualquier modelo de cualquier año, haciendo imposible que todo el equipo de una misma marca y de un mismo año y modelo utilicen el mismo filtro. Por esta razón, no podemos hacernos responsables de selecciones erróneas o aplicaciones mal hechas.

Los nombres comerciales o marcas registradas de los fabricantes de equipos se dan solamente para propósito de identificación. No existe ninguna afiliación, patrocinio o conexión con el fabricante o pieza de equipo original.

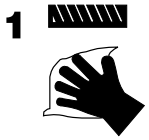
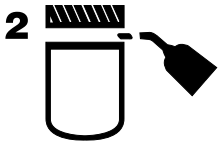
SPIN-ON FILTER INSTALLATION INSTRUCTIONS

An increasing number of motorists today are performing oil and filter changes on their cars. However, present installation instructions vary from manufacturer to manufacturer, and may be confusing to the installer.

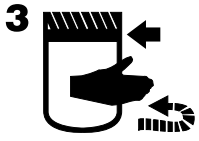
These instructions may be used in changing any spin-on oil filter.



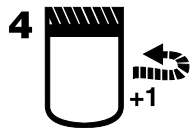
1. **Clean base.**
   Unscrew and remove old filter. Be sure old gasket is removed with filter. Wipe filter mounting base with clean cloth.



2. **Apply clean oil to gasket.**
   Apply thin film of clean motor oil to new filter gasket. Do not use grease.

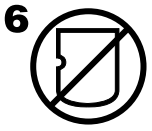


3. **Spin-on to gasket contact.**
   Line up threads carefully to avoid cross-threading. Spin new filter on until gasket contacts base.



4. **Tighten additional turns.**
   Tighten filter the required number of turns beyond gasket contact. Important - Follow instructions of filter manufacturer (usually found on filter) for final tightening. This example shows to tighten filter 1 turn past gasket contact. This may be different for other filters.

5. **No leaks.**
   Be sure oil shows full on dipstick. Start engine and check for leaks. Correct source of any leaks observed. Shut off engine. Re-check oil level. Add oil if necessary.



6. **Inspect for dents.**
   Important – Do not use filter if it is dented.

EASY STEPS IN CHANGING TRANSMISSION FILTERS

1. Warm up the vehicle so the transmission is at normal operating temperature. Pull the transmission dipstick (located near the firewall in most cars). Fresh fluid is translucent and cherry red. Some darkening is normal, but if it is a reddish-brown or mustard color and smells like burnt varnish, it is worn out. Turn the vehicle off.
2. Drain the fluid by loosening the pan. Select the correct Baldwin replacement filter and prepare a large pan to catch the fluid. Then, loosen each pan bolt a turn or two, loosening one corner more than the rest. Drain mostly from this corner.
3. Finish removing the pan and any gasket material from the pan or case. Avoid scratching the metal and make sure the pan's gasket surface isn't bent or distorted.
4. Remove the old filter. Most transmission filters are held in place with a bolt or two, but some are held by a clip. Be careful to include O-Rings or other seals.
5. Install a new filter. Use the clips or bolts from the old filter. Be sure O-Rings, etc. are in place. If the filter has a long intake neck, gently push the neck into place without unseating the O-Ring.
6. Inspect the pan before cleaning. A small amount of fine gray clutch dust is normal. However, if you find metal shavings, there has been transmission damage. Clean the pan thoroughly with solvent and wipe dry so there is no harmful residue.
7. Position gasket on pan. Some gaskets have four holes slightly smaller than the rest to allow four bolts through the pan and through these smaller holes to hold the gasket in place.
8. Hand tighten pan bolts in a criss-cross pattern. After that, use a torque wrench to tighten to 10 or 15 pounds maximum.
9. Refill the transmission fluid using only the amount and type of fluid specified. Be sure the dipstick funnel is clean before using it.
10. Recheck the fluid level. With the vehicle on level ground, set the parking brake and the transmission in "Park" or "Neutral." Let the engine idle for a few minutes. Shift the transmission into different positions before returning the lever to "Park" or "Neutral." Check the fluid level again and check for leaks.

TRANSMISSION IDENTIFICATION CODE LISTING

GENERAL MOTORS AUTOMATIC TRANSMISSIONS

GM has placed labels on cars since 1984 (on trucks since early 1970's) containing Regular Production Option (RPO) families of different vehicle areas (ex. axles, brakes, transmissions).

Locations for Label:

On Automobiles
1. Spare Tire Cover
2. Deck Lid
3. Right Rear Wheel Well
4. Rear Quarter Panel

On Trucks
1. Engine Compartment
2. Glove Box
3. Hood

The RPO transmission codes are listed alpha-numerically from M01 - M99 and MA2 - MY9 in the chart below.

To determine the correct transmission filter:
1. Locate the RPO code
2. Use the chart to determine the correct transmission
3. Refer to the transmission model on the following pages for proper filter

A WORD ABOUT WARRANTIES

Heavy-duty equipment manufacturers and dealers like to sell their brand of filter. But, the law does not permit them to require you to use their brand in order to keep the warranty in effect. Baldwin filters meet or exceed manufacturers' requirements and specifications. If engine damage is caused by our filter, our warranty applies regardless of whether your equipment is still under the manufacturer's warranty.

If a filter is suspected of causing a failure, don't throw away the evidence. Instead, in order to process a warranty claim, follow the Product Investigation Procedure . . .

1. Complete a Field Report Form (Form 387). Describe the events on a separate sheet.
2. Obtain a sample of oil, fuel or coolant in the system at the time of the failure.
3. Save damaged parts for evidence of the claimed damage.
4. For an air filter, cover the open ends with tape to prevent dust from entering the element during shipping.
5. Send copies of any repair bills.
6. Send the entire suspect filter, including the gaskets. Do not cut open the filter or tamper with it in any way. Package the filter carefully to prevent damage to packaging or paperwork.

UN MOT SUR LES GARANTIES

Les concessionnaires et les fabricants de gros équipement aiment vendre les filtres de leur marque. Mais la loi ne les autorise pas à vous obliger d'utiliser leur marque pour conserver la garantie active. Les filtres Baldwin répondent ou surpassent les exigences et spécifications des fabricants. Si votre moteur est endomagé par nos filtres, notre garantie s'applique que votre équipement soit encore ou non sous la garantie du fabricant.

Si un filtre est soupçonné causer une défaillance, n'en jetez pas la preuve. Afin de pouvoir faire une réclamation au titre de la garantie, suivez la Procédure d'investigation de produit . . .

1. Remplissez un formulaire de rapport terrain (Form. 387). Décrivez les événements sur une feuille séparée.
2. Obtenez un échantillon d'huile, de carburant ou de liquide de refroidissement du système au moment de la défaillance.
3. Conservez les pièces endommagées comme preuve des dégâts pour la réclamation.
4. Pour un filtre à air, couvrez de ruban adhésif les extrémités ouvertes pour éviter que la poussière n'entre dans la cartouche pendant l'expédition.
5. Envoyez des copies des factures de réparation éventuelles.
6. Envoyez le filtre suspect entier, y compris les joints. N'ouvrez pas le filtre et n'essayez pas de le modifier de quelque façon que ce soit. Emballez-le soigneusement pour éviter d'endommager l'emballage ou les papiers.

UNA PALABRA ACERCA DE LAS GARANTÍAS

Los fabricantes y concesionarios de equipos para servicio pesado prefieren vender su marca de filtro. Pero, por ley no les está permitido a exigir el uso de su marca para mantener vigente la garantía. Los filtros Baldwin cumplen o exceden los requerimientos y las especificaciones de los fabricantes. Si el motor se llegara a dañar por culpa de nuestro filtro, nuestra garantía es la que es válida indiferente a si el equipo todavía está cubierto por la garantía del fabricante.

Si se sospecha que un filtro es el causante de la avería, no tire a la basura la evidencia. En vez, para poder tramitar el reclamo de garantía, siga el procedimiento de investigación del producto...

1. Llene un formulario de informe de campo (Form 387). Describa los eventos en una hoja aparte.
2. Saque una muestra del aceite, combustible o refrigerante del sistema al momento de ocurrir la avería.
3. Guarde las piezas dañadas como evidencia del daño reclamado.
4. Para un filtro de aire, tape los extremos abiertos con cinta adhesiva con el fin de evitar la entrada de polvo al elemento durante el transporte.
5. Envíe copias de cualquier factura de reparación.
6. Envíe el filtro sospechoso completo, incluidas las juntas. No abra el filtro ni lo estorbe de manera alguna. Empaquete el filtro cuidadosamente para impedir que se dañe el empaquetado o los documentos.

This procedure outlines the steps necessary for Baldwin Filters Service Engineering to complete an investigation of products from the field. The steps of this procedure are necessary to provide the most accurate and timely investigation possible.

If a filter is suspected of causing a failure, don't throw away the evidence. In order to process a warranty claim, follow the Product Investigation Procedure . . .

1. Complete a Field Report Form (Form 387) (see next page). Describe the events on a separate sheet.
2. Obtain a sample of oil, fuel or coolant in the system at the time of the failure.
3. Save damaged parts for evidence of the claimed damage.
4. For an air filter, cover the open end(s) with tape to prevent dust from entering the element during shipping.
5. Send copies of any repair bills.
6. Send the entire suspect filter, including the gaskets.

If the investigation is being requested for warranty consideration, repair bills (not estimates) should also accompany the request. Damaged equipment components such as bearings, liners, etc. should be retained by the customer for possible examination by Service Engineering.

Filter products are **NOT** to be cut open or otherwise tampered with. This may prevent objective analysis and testing, and **may void the warranty**.

Notice of damages and claims should be made immediately when the damage occurs. Every claim will receive careful and objective consideration. If a Baldwin product is proven to have caused damage, Baldwin will pay the cost required to repair the equipment to its condition at the time the failure occurred. Liability payment will not include consequential damages such as downtime, motel bills, etc.
